

# Nalu Rajes

## **about the artist**

I am a retired Indian Singaporean aged 62. My line of work has all along been office administration. Following retirement, I pursued my interest of looking after pre-schoolers and in preparation, joined modern Montessori school. Of the many modules I did was one that assessed creativity arts. It was a heavy module and when I submitted my folder, the lecturer took to it. Highly impressed, she passed it around to everyone in the school. This piece of work did inspire many of the course participants. This could well have been the starting point in my current pursuit as an artist. I followed my whims one fine day, bought some paints, canvasses, brushes and started my first serious piece.
